Kenny and Don,

I trust you had a merry Christmas and happy new year. I know I enjoyed the time off after a very busy year.

I see that you are making substantial progress in filling Lovewell given the favorable weather.

Can you tell me the elevations and contents of your normal targets for the spring and fall?

What is your plan for filling Lovewell? Are you planning any pause in your diversions when you reach a certain elevation?

I wonder if you can look over the web page below to see if you have any suggestions for improvement:

[http://www.accesskansas.org/kda/dwr/Interstate/Republican\\_River\\_data.htm](http://www.accesskansas.org/kda/dwr/Interstate/Republican_River_data.htm)

You will note there is a link labeled "Real-time data for selected streamflow stations from Harlan County to Milford" that pulls daily streamflows for selected stations below Harlan County. I will likely will build something similar for above Harlan County (RR at Orleans, Sappa at Stamford and Lyle, Beaver at Cedar Bluffs, Prairie Dog Creek at Woodruff).

We had our hearing before the Special Master yesterday on the settlement. It seemed to go fairly well.

David Barfield
