Subject: Lovewell Target

Kenny

It would appear that we could be at the target elevation by the end of the week. I would like to remind you that we cannot and should not exceed the 84.20 elevation. My main concern is that we have established a good relationship with the COE and I don't want to do anything to jeopardize it.

So as we approach the target you will most likely will want to start using water above or below Lovewell. Bill and group will keep you advised as we zero in. Call if you have questions.

Thanks.

Marv
