Hello Kenny,

We generally update the water supply numbers with end of month data gathered from our records and the COE. As you know, Nebraska DNR has been providing us weekly information on the purchased protected water upstream of Harlan County Lake this year. Should be able to come up with some pretty good numbers early next week.

Bill

I have a Board meeting on Thursday August 2. I would like an update from you when we get closer to that date. My unofficial accounting looks like we are doing very well with our supply to this point.

Kenny
