RE: Field Office Application for Change

Water Right, File Nos. 16406, 20926, 20928, 20939, 20930, 20933, 20934,

21528, 23803

Dear Sir:

Enclosed are orders executed by the designee of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, approving applications for change under the above referenced file numbers.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in these approvals for change. A condition of this approval is that an acceptable water flow meter must be installed on the diversion works authorized under the referenced file numbers and meet current specifications. Please return the required notification of completion of the diversion works and installation of the required meter as soon as these actions are completed.

Since these orders modify the original documents referred to above, they should be recorded with the Register of Deeds as other instruments affecting real estate.

The abandoned well must be plugged in accordance with the requirements of Article 30 of the Rules and Regulations as adopted by the Kansas Department of Health and Environment.

Should you have any questions, please feel free contact this office. If you would prefer, you could arrange an appointment for additional assistance.

Sincerely,

Water Commissioner

RE:

Application for Change in Point of Diversion Water Right, File Nos. 16406 & 23803

Applications for Change in Place of Use

Water Rights, File Nos. 16406, 20926, 20928, 20929,

20930, 20933, 20934, 21528 & 23803

Dear Mike:

We have completed a review of the applications for the above referenced water rights. The proposed change in point of diversion is in accordance with current area rules, K.A.R. 5-23-3, as it pertains to distance moved and minimum spacing to neighboring wells. The proposed change in place of use is in accordance with K.A.R. 5-5-11(b).

Well evaluations were conducted to estimate possible effects of the proposal on the supply of other wells with water rights prior to the proposal per K.S.A. 82a-708b, and the draft revised management program. Under K.S.A. 82a-708b, an applicant requesting a change in point of diversion must demonstrate to the chief engineer that any proposed change is reasonable and will not impair. The enclosed report is an analysis performed by the GMD on behalf of our membership. Under this analysis, the proposed change is considered to be reasonable and unlikely to impair if either the net in-season well-to-well effect of the proposed change is less than a strict maximum allowable threshold (4.0 ft in cases where saturated thickness greater than 200 ft), or if no well with a net well-to-well effect exceeding the threshold is identified as critical. Critical wells are identified as wells that are expected to either lose or greatly diminish water supply over the next 25 years. The attached review information is based on a Theis analysis using inputs from the GMD3 aquifer model, which is considered to be the best information on well and aquifer data readily and easily available to the public. If either the applicant or the neighbors believe they have better data that might change the result of the analysis, they should contact GMD3. Conclusions of the well analysis may change if better information on well and aquifer data can be made available.

Every neighboring well within 1 mile of the proposed move was evaluated. Evaluations showed that none of the neighboring wells exceeded the net effect above the maximum allowable threshold and were under that threshold. No further critical well analysis was needed. Our office received no response and did not have any comments of concern. The prior change under File No. 16406, the Board recommended that if the stacking of authority occurred, that unstacking should be viewed under the additional well criteria. That recommendation was not part of the change approval order. Using the calculation for the additional well rule, the water right would have no consumptive use reduction. The authority was stacked for less than a year and would be difficult to determine net effects before this change was filed. Therefore, GMD3 sees this move as reasonable and therefore recommend that the applications be approved. If aquifer conditions change or there is a change to the water right in the future, we would be happy to evaluate the effects at that time.

SEP 02 2021 02 2021

The proposed change in place of use will make a complete overlap in currently authorized acres, with no new acres being proposed. This consistent with K.A.R. 5-5-11(B). therefore, GMD3 sees this change also reasonable and recommend that the applications be approved.

Thank you for the opportunity to review the applications and to provide a recommendation. If you have any questions, please don't hesitate to contact us.

Sincerely,

Jason L. Norquest

Assistant Manager

GMD3 Change Review

Changes in PU do not propose any new acres, just a complete overlap in currently authorized acres.

The PD changes are a shift of three wells, with only one new well being proposed. 16406: Proposes to unstack the authority that was approved in spring of 2021. It will move to the location currently authorized by 23803 ID8. At that time GMD3 Board recommended a waiver to the change and recommended that if it was unstacked, applicant had to follow the additional well rule. DWR approved the waiver and change, but no condition put on unstacking.

Current well is authorized 504AF @ 1925gpm. Proposed going back to original authority of 252AF

23803 ID8: Proposes to move the authorized authority to the well currently under 23803 ID9.

Currently authorized 272AF @ 825gpm

23803 ID9: Proposed moving to a new location further SW of current location. Currently authorized 272AF @ 875gpm.

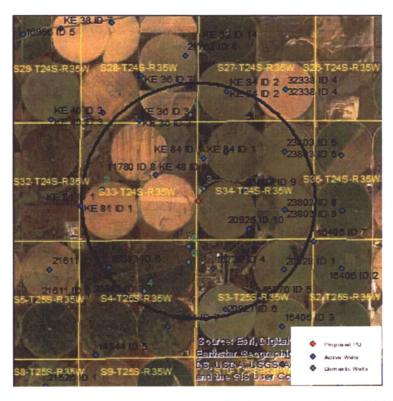

Is a waiver needed: <u>The change in PU is for a complete overlap, with no new acres proposed</u>. The changes in PD are less than half mile and minimum spacing appears me. Analysis shows that the proposed change is within the guidelines.

Recommendation: <u>After review of all available information, it appears current area rules are met.</u> Staff would recommend approval.

John

Evaluation of proposed move for Water Right Nos 16406 and 23803

Proposed: Move half of water right no. 16406 ID7 to the well currently authorized under water right no. 23803 ID8, located 1,951 ft to the northwest. Move water right no. 23803 ID8 to the well location currently authorized under water right no. 23803 ID9, located 2,006 ft to the northwest. Move water right number 23803 ID9 to a new well location, 2,123 ft to the southwest. The new well location will be authorized 272 AF at a rate of 875 gpm. No other well location is increasing authority, and water use is not expected to change at those well locations, so effects were only calculated from the new well location.

Wells within 1 mile: KE 84, 23803 ID5, 23803 ID6, 23803 ID8, 23803 ID9, 20926, KE 36, KE 34, KE 48 & 11780, 26383, 15730, 20927, 20928, 45870, and six domestic wells, numbered on the above map.

The saturated thickness at the proposed well location is estimated to be 217 ft, based upon the GMD3 model, the driller's log, and an observation well in section 2-25-35. For saturated thickness greater than 200 ft, the drawdown allowance is 4.0 ft.

50 year Theis Analysis: The following values were used to run the analysis:

S = 0.1304, T = 10,021 ft²/day, tp_{proposed} = 70 days, Q_{proposed} = 875 gpm

Theis drawdowns were calculated as follows:

KE 84: Net drawdown = 2.9 ft

23803 ID5: Net drawdown = **1.5** ft

23803 ID6: Net drawdown = **2.3 ft**

23803 ID8: Net drawdown = 1.7 ft

23803 ID9: Net drawdown = **2.7** ft

20926: Net drawdown = **2.3** ft

KE 36: Net drawdown = 1.5 ft

KE 34: Net drawdown = 1.4 ft

KE 48 & 11780: Net drawdown = **2.6 ft**

26383: Net drawdown = **1.4 ft**

15730: Net drawdown = **2.0 ft**

20927: Net drawdown = **1.4 ft**

20928: Net drawdown = **1.4 ft**

45870: Net drawdown = **1.4 ft**

Domestic 1: Net drawdown = 1.7 ft

Domestic 2: Net drawdown = 1.5 ft

Domestic 3: Net drawdown = 5.7 ft

Domestic 4: Net drawdown = 1.5 ft

Domestic 5: Net drawdown = 2.7 ft

Domestic 6: Net drawdown = 2.2 ft

Net drawdown exceeds the drawdown allowance of 4.0 ft for the domestic well labeled "3" on the map, located just northeast of the proposed well location. Critical well analysis was performed at this domestic well location.

Critical Well Evaluation:

Domestic 3:

Water Column = 124 ft (Based on depth of the well. Nearby well logs indicate that this well could likely be redrilled into deeper formation.)

DP = 5.7 ft (Net drawdown from the proposal indicated above)

DE = 41.3 ft (Water level decline from 2021 through 2046 based upon GMD3 model)

DT = 47.0 ft

Economic Drawdown Constraint (EDC) = 0.4 * 124 ft = 49.6 ft

Physical Drawdown Constraint (PDC) = 124 ft - 20 ft = 104 ft

Total drawdown of 47.0 ft is less than the EDC and PDC, so this well is not critical.

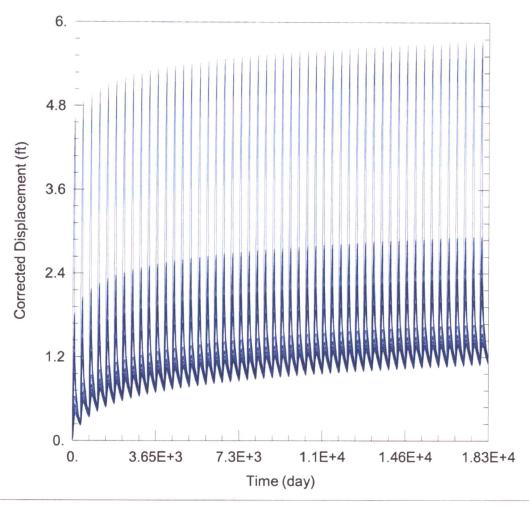

RECEIVED

SEP 02 2021

Garden City Field Office Division of Water Resources

Conclusion:

The proposed moves are not likely to create noticeable effects on most neighboring wells. One domestic well in the area may have a noticeable effect, but this well is owned and operated by the applicant, and analysis did not flag the well as critical. GMD3 staff recommends approval of the application.

Dear Mr. Norquest:

This is to advise you that Vyn Land and Cattle has filed application for approval of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, to change the point of diversion and place of use.

We are delaying action on the change applications to allow you time to review and provide a recommendation. Please submit a recommendation within 15 days from the date of this letter.

Thank you and as always feel free to contact this office at any time.

Sincerely,

Michael A. Meyer

Water Commissioner

RE:

Water Right, File Nos. 23803

Dear Sir:

This is to advise you that Vyn Land and Cattle has filed applications for approval of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, for change in point of diversion (and change in place of use) under the above referenced applications. Please note there are three applications that are nearby or within one half mile of some of your water right wells.

You can find the complete application posted by water right file number as referenced above at www.agriculture.ks.gov/divisions-programs/dwr/water-appropriation/notices.

You are notified on this proposed points of diversion (wells) (and change in place of use) so that you may furnish this office with any comments or other information you may want to submit. Such comments or other information must be received in this office within 15 days from the date of this letter.

Should you have any questions, please feel free to call this office. If you would prefer, an appointment could be arranged for additional assistance. Please refer to the file number when you contact us if you wish to discuss a specific file.

Sincerely,

Michael A. Meyer
