Water Right, File Nos. 709 & 8398

Dear Sir:

Enclosed are orders executed by the designee of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, approving the application for change under the above referenced file numbers.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in this approval for change. A condition of this approval is that an acceptable water flow meter must be installed on the diversion works authorized under the referenced file number and meet current specifications. Please return the required notification of completion of the diversion works and installation of the required meter as soon as these actions are completed.

Since the orders modify the original documents referred to above, they should be recorded with the Register of Deeds as other instruments affecting real estate.

The abandoned well must be plugged in accordance with the requirements of Article 30 of the Rules and Regulations as adopted by the Kansas Department of Health and Environment.

Should you have any questions, please feel free contact this office. If you would prefer, you could arrange an appointment for additional assistance.

Sincerely,

RE: Application for Change in Point of Diversion  
Water Rights, File Nos. 709 & 8398

Dear Mike:

We have completed a review of the application for the above referenced water right. The proposed change in point of diversion is in accordance with current area rules, K.A.R. 5-23-3, as it pertains to minimum spacing to neighboring wells and distance moved.

Well evaluations were conducted to estimate possible effects of the proposal on the supply of other wells with water rights prior to the proposal per K.S.A. 82a-708b, and the draft revised management program. Under K.S.A. 82a-708b, an applicant requesting a change in point of diversion must demonstrate to the chief engineer that any proposed change is reasonable and will not impair. The enclosed report is an analysis performed by the GMD on behalf of our membership. Under this analysis, the proposed change is considered to be reasonable and unlikely to impair if either the net in-season well-to-well effect of the proposed change is less than a strict maximum allowable threshold (3.5 ft on the sections saturated thickness ranging 150-200 ft), or if no well with a net well-to-well effect exceeding the threshold is identified as critical. Critical wells are identified as wells that are expected to either lose or greatly diminish water supply over the next 25 years. The attached review information is based on a Theis analysis using inputs from the GMD3 aquifer model, which is considered to be the best information on well and aquifer data readily and easily available to the public. If either the applicant or the neighbors believe they have better data that might change the result of the analysis, they should contact GMD3. Conclusions of the well analysis may change if better information on well and aquifer data can be made available.

Every neighboring well within 1 mile of the proposed move was evaluated. Evaluations showed that none of the neighboring wells exceeded the net effect above the maximum allowable threshold and no critical wells determined. We did not receive any comments from neighbor notices. Therefore, GMD3 sees this move as meeting current rules and would recommend approval of the applications. If aquifer conditions change or there is a change to the water right in the future, we would be happy to evaluate the effects at that time.

Thank you for the opportunity to review the applications and to provide a recommendation. If you have any questions, please don't hesitate to contact us.

Sincerely,

  
Jason L. Norquest  
Assistant Manager

**Reported 400gpm on 2017 WUR.**

Is a waiver needed: Move is less than half mile. Minimum Spacing appears to be met.

Analysis shows possible effects within our guidelines with no critical wells determined.

Recommendation: After review of all available information, it appears current area rules are met. Staff therefore recommends approval of the applications.

Dear Sir:

Based on your request today, the chief engineer has granted an extension of time to provide the required information for the pending applications to have the applications complete and in proper form.

It is required by K.A.R. 5-5-1(c) Filing an application for change, that the Division of Water Resources, is required to obtain a notarized signature from each landowner and their spouse, or a duly authorized agent that are part of the referenced water rights. All signing must be done with a notary public present. Landowners for the Southwest Quarter (SW $\frac{1}{4}$ ) of Section 25, and the Southeast Quarter (SE $\frac{1}{4}$ ) Section 30, both in Township 30 South, Range 32 West will need sign each application in the presence of a notary. Also please submit copies of deeds of these tracts of land to document the current ownership.

For the applications to retain their priority of filing, all required signatures of all landowners must be completed and returned to this office on or before, **January 21, 2022**. According to law, default in returning requested information as outlined above within the time allowed or any authorized extension of time, shall cause dismissal of the applications for change under the above referenced file numbers.

If these signatures cannot be obtained, the processing of your request to relocate the well cannot be acted upon without other possible forms of agreements showing other owners of land do not have a legal interest in the water rights, or requests to divide the existing water rights and interests between landowners, or other forms of final actions to move forward with continued processing for final decision to relocating your well as proposed.

If you have any questions, please contact our office. Please reference the water right file numbers listed above so that we may help you more efficiently.

Sincerely,
