### Additional Information to Industrial Use Supplemental Sheet

This business was purchased on 10 April, 2015. An application for a storm water discharge permit was made and approved on 22 March 2017, effective 1 April 2017. City of Wichita issued approved discharge into the storm water system on 24 March in accordance with the permit. A permit to appropriate water is required to proceed.

The yellow cells indicate best estimate for water requirements: 31.54 Mgal/per year or 96.78 acre-feet. HVAC experts estimate 1-3 gal/min per ton of AC for cooling requirements. Spring Clean at 416 N Ridge Road operates with a total of 30 tons of heat pumps for heating/cooling. Yearly requirements for different gal/min per ton are shown in the table. In each scenario, 30 tons are in operation continuously for the estimate. Though 30 tons in operation continuously is not expected, water requirements will vary and normally increase for such things as different manufacturers heat pump model requirements, increased water temperature of the water (for cooling), or decreased water temperature (for heating), etc. Therefore, 30 tons in operation continuously serves to account for other factors to provide a yearly estimate.

Maximum gal/min as requested in paragraph 3 of the application was computed assuming a high-water demand situation during peak operations: 30 tons in operation at 2.5 gal/ton per minute: 75 gal/min.

Heat Pumps Water Requirements (dependent on gal/ton/min)	min/hr	hr/day	days/yr	tons / min	gal / ton	Yearly Water Mgal	Yearly Acre Ft	Annual Water Cost \$.03/kGal

30 tons at 1.5 gal/ton	60	24	365	30	1.5	23.65	72.59	\$709.56

Minimum Desirable Streamflow

Dear Sir:

I understand that a Minimum Desirable Streamflow requirement has been established by the legislature for the source of supply to which the above referenced application applies.

I understand that diversion of water pursuant to this application will be subject to regulation any time Minimum Desirable Streamflow requirements are not being met.

I also understand that if this application is approved, there could be times, as determined by the Division of Water Resources, when I would not be allowed to divert water. I realize that this could affect the economics of my decision to appropriate water.

I am aware of the above factors, and with the knowledge thereof, request that the Division of Water Resources proceed with processing and approval, if possible, of the above referenced application.

RE: Application  
File No. 49823

Dear Sir or Madam:

Your application for permit to appropriate water in 22-27S-01W in Sedgwick County, was received and has been assigned the file number noted above.

As a matter of record, the Division of Water Resources has on hand a large number of applications awaiting processing. Therefore to be fair to all concerned, and so that we can process those applications on hand in the order they were received, we intend to concentrate on the backlog of applications until the issue is resolved. Once review of your application has begun, we will contact you, if additional information is required.

In accordance with the provisions of the Kansas Water Appropriation Act, a portion of which is included below, the use of water as proposed prior to approval of the application is unlawful. Once approved, compliance with the terms, conditions and limitations of the permit is necessary. Conservation of the water resources of Kansas is required.

**Section 82a-728 of the Kansas Water Appropriation Act, provides (a) except for the appropriation of water for the purpose of domestic use, . . . it shall be unlawful for any person to appropriate or threaten to appropriate water from any source without first applying for and obtaining a permit to appropriate water in accordance with the provisions of the Water Appropriation Act or for any person to violate any condition of a vested right, appropriation right or an approved application for a permit to appropriate water for beneficial use.**

**(b) (1) The violation of any provision of this section by any person is a class C misdemeanor . . .**

**A class C misdemeanor is punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. Each day that the violation occurs constitutes a separate offense.**

If you have any questions, please contact me at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,
