M E M O R A N D U M

TO: Files
FROM: Leslie Ireland

DATE: March 31, 2017
RE: Water Right, File Nos. 9,883 & 24,018

Tiffany Meredith on behalf of Fox Ridge Master Association, has filed an application for approval to change the irrigation and recreational uses of water authorized under File No. 9,883. The application was received in this office on May 27, 2014. Tiffany Meredith is the Manager of the Home Owners Association (HOA).

The file requesting the change was not in good standing at the time of filing, and had to remit a fine for not filing water use reports. On February 25, 2017, Andy Terhune, Water Use Unit Supervisor was contacted about the required fines and filings. He indicated the water use reporting issues have been resolved.

The owners are requesting to change the right from irrigation and recreational use to all irrigation use. This would result in the 8.28 acre-feet (AF) authorized for recreational use added to the 18.42 AF irrigation use, for a combined total of 26.7 AF for irrigation use.

File No. 9,883 is currently authorized one well located in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 32, with a maximum rate of 300 gallons per minute (gpm) for the diversion of 18.42 acre-feet (AF) for the irrigation use on 46.7 acres and 8.28 AF for the recreational use portion for the filling and maintaining of 6 interconnected reservoirs that have a combined total of 35 surface acres. The point of diversion and places of use are all located in the South half of Section 32, Township 26, Range 1 W, Sedgwick County. The rate is limited to 300 gpm for each use. The places of use have a complete overlap with Water Right, File No. 24,018, that is authorized limited quantity and rate of 70.05 AF for irrigation use and 58.33 AF for the recreational use, both to be diverted at 825 GPM from one (1) well located in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 32, Township 26, Range 1 W, Sedgwick County. This junior right is limited to 825 gpm under any use and has the additional limitation not to exceed its authorized quantities when combined with File No. 9,883. The reservoirs are also authorized under File No. 45,882 for the impounding of surface water and Structure Permits SSG-0459 & SSG-0460.

The requested change will result in File No. 9,883 to be authorized 26.7 AF for irrigation use from the well located in the Southwest Quarter of Section 32. The change will allow the removal of the limitation on the rate. The rate will remain at 300 gpm.

The 35 acres of ponds intercept the groundwater table, but during construction the ponds were lined to prohibiting seepage. No quantity was allocated for the seepage. The existing reservoirs were evaluated by K.A.R. 5-6-7, *Determination of average annual potential net evaporation loss*:

$$20 \text{ inches annual evaporation} \div 12 \text{ inches} = 1.67 \text{ feet} \times 35 \text{ acres} = 58.33 \text{ AF}$$

The potential net evaporation per K.A.R. 5-6-3, will remain authorized under File No. 24,018. This right's 58.33 AF for recreational use and limited to that amount with File No. 9,883 can be updated. The additional limitation on the recreational use can be removed, allowing File No. 24,018, to be the sole right for the recreational use. A Findings and Order to remove this limitation will be completed.

The 46.7 irrigated acres as detailed in K.A.R. 5-3-23, *Maximum reasonable annual quantity approvable for irrigation use for an application for change in place of use and a request to reduce a water right*, the quantity reasonable for this area is 1.5 acre-foot per acre as per K.A.R. 5-3-19, *Maximum reasonable annual quantity of water for irrigation use*. A total of 70.05 AF has been historically justified for irrigation use. The change will authorize irrigation quantities of 26.7 AF under File No. 9,883, and 51.63 AF, under File No. 24,018, for a combined total of 78.33 AF, but will remain limited to 70.05 AF under File No. 24,018. This limitation will assure the quantity used to remain reasonable and consumptive use will not increase per K.A.R. 5-5-3, *Change in consumptive use*.

Water Right, File Nos. 9,883 & 24,018, had a Compliance Investigation completed in October 2008, which determined by GPS protocol the actual location of each well authorized. File No. 9,883 was determined to be 2,399 feet North and 5,159 feet West of the Southeast corner of Section 32, approximately 264 feet from authorized. The investigation found the well under File No. 24,018, to be approximately 304 feet from authorized, at 1,346 feet North and 1,420 feet West of the Southeast corner of Section 32. The locations of the points of diversion will be updated.

As required by statute well owners, other than those owned by the HOA, that were determined to be located within a quarter (1/4) mile of the well authorized by File No. 9,883, were contacted by letter on the proposed change. One call was received inquiring about the letter and one letter was returned by the post office for a bad address. No written comments were received from the notification letters.

The Equus Beds Groundwater Management District No. 2, recommended approval of the referenced application by letter dated March 3, 2015.

Jeff Lanterman, Water Commissioner of the Stafford Field Office, recommended approval of the requested change for File No. 9,883 and modification of the additional limitation on File No. 24,018 per his email dated March 31, 2017.

The transmittal letter will reiterate that the quantity utilized per use should be metered so that the quantity diverted may be readily determined. A check valve is required if any chemical or foreign substance is injected into the water through the diversion works. A water level measurement tube and WWC-5 will not be required as no new wells have been authorized. The water use correspondent will remain as sequence #2 in the database.

Based on the above discussion, that consumptive use will not increase and that no change in the local source of supply will occur, it is recommended that the referenced application for File No. 9,883 be approved, and the order for File No. 24,018 be signed.

RE: Water Right, File Nos. 9,883 & 24,018

Dear Sir or Madam:

Enclosed are the orders executed by the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture. The order under File No. 9,883 is for the approval of the change and to update the description of the well location. The order under File No. 24,018 is due to the change to File No. 9,883, and to also update the location of the well.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in the approval for change. A condition of the approval is that a water flowmeter meeting 5-1-4 through 5-1-12 must be installed on the diversion works for each use of water authorized under the referenced file. Please complete and return the enclosed form, *Notification of Completion of the Diversion Works and/or Installation of Flowmeter Installation* prior to diversion of water.

Since this order modifies the original document referred to above, it should be recorded with the Register of Deeds as other instruments affecting real estate.

Please be reminded that reports of water usage must be submitted to this office annually. Records indicating the amount of water used should be furnished to the Chief Engineer by March 1 following the end of the previous calendar year so that the continued use of water becomes a matter of record in this office. The owner, or his or her legally designated agent, is held responsible for submitting annual water use reports. Failure to file an accurate water use report is a violation of law which makes you subject to civil penalties.

If you have any questions, regarding the enclosed approval document please contact Leslie Ireland, Environmental Scientist, at (785) 564-6633. Should you have questions regarding the meter requirement please contact Jeff Lanterman, Water Commissioner, at the Stafford Field Office at (620) 234-6900. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

A handwritten signature in black ink, appearing to read "Brent A. Turney".

DIVISION OF WATER RESOURCES
David W. Barfield, Chief Engineer

**APPROVAL OF APPLICATION
FOR
CHANGE IN USE MADE OF WATER
AND
ORDER IN THE MATTER OF THE LOCATION
OF THE AUTHORIZED POINT OF DIVERSION
WATER RIGHT, FILE NO. 9,883**

The Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, after due consideration of the written application of Tiffany Meredith, Manager, Fox Ridge Master Association, HOA Management Services, 900 N. Tyler Blvd. Suite 7, Wichita, Kansas 67212, received in this office on May 27, 2014, for approval of a change in the use made of water under the certificate of appropriation issued pursuant to the application for permit to appropriate water for beneficial use, as modified and amended by the Order of the Chief Engineer dated January 16, 1992, approving the application to change the point of diversion, and by the Order of the Chief Engineer dated December 23, 2005, approving the application to change the use made of water, place of use and point of diversion, and by the Correctional Order of the Chief Engineer dated August 8, 2011, to correct the location of the authorized point of diversion, finds that the change is reasonable and will not impair existing rights, and that the change relates to the same local source of supply and that the application should be and is hereby approved.

The effective date of the change shall be the date this order is executed by the Chief Engineer, after which 26.7 acre-feet of water per calendar year shall be authorized for:

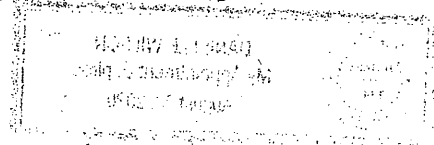

Irrigation Use

from the authorized point of diversion better described as being:

one(1) well located in the Northwest Quarter of the Northwest Quarter of the Southwest Quarter (NW $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$) of Section 32, more particularly described as being near a point 2,399 North and 5,159 feet West of the Southeast corner of said section, in Township 26 South, Range 1 West, Sedgwick County, Kansas,

located substantially as shown on the topographic map accompanying the application to change the use made of water.

All diversion works into which any type of chemical or other foreign substance will be injected into the water pumped from the diversion works shall be equipped with an in-line, automatic, quick-closing check valve capable of preventing pollution of the source of the water supply. The type of valve installed shall meet specifications adopted by the Chief Engineer and shall be maintained in an operating condition satisfactory to the Chief Engineer.

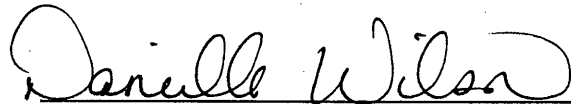

CERTIFICATE OF SERVICE

On this 10th day of April, 2017, I hereby certify that the attached Approval of Application for Change in Use Made of Water and Order in the Matter of the Location of the Authorized Point of Diversion under Water Right, File No. 9,883, dated April 7th, 2017 was mailed postage prepaid, first class, US mail to the following:

*Filing Fee Must Accompany the Application
(Please refer to Fee Schedule on signature page of application form.)*

Paragraph Nos. 1, 2, 3, 4 & 8 must be completed. Complete all other applicable portions. A topographic map or detailed plat showing the authorized and proposed points(s) of diversion and /or place of use must accompany this application.

1. Application is hereby made for approval of the Chief Engineer to change the

- Place of Use
- (Check one or more) Point of Diversion
- Use Made of Water

File No. 9883

Manager of HOA

2. Name of applicant: Fox Ridge Master Association, c/o HOA Management Services, Attn: Tiffany Meredith

Address: 900 N. Tyler Road, Suite 7

City, State and Zip: Wichita, KS 67212

Phone Number: (316)351-7650 E-mail address: tiffany@homeownermgmt.com

What is your relationship to the water right; owner tenant agent other? If other, please explain. _____

Name of water use correspondent: Fox Ridge Master Association, c/o Jack Queen

Address: 3230 N. Flat Creek

City, State and Zip: Wichita, KS 67205

Phone Number: (316-772-1899) E-mail address: jrqueen@farcoop.com

3. The change(s) proposed herein are desired for the following reasons (please be specific): Change the use made of water from irrigation and recreational to only irrigation use. The recreational place of use overlaps with Water Right Nos. 24018 and 45882, which have sufficient quantity for recreational use. The irrigation quantity for Water Right No. 9883 is not sufficient; therefore the use made of water is being changed to all irrigation use.

The change(s) will be completed by ASAP

KS DEPT OF AGRICULTURE

12. The presently authorized use of water is for irrigation and recreational purposes.
It is proposed that the use be changed to irrigation purposes.
13. If changing the place of use and/or use made of water, describe how the consumptive use will not be increased.
Consumptive use will not be increased as the use made of water is being changed from irrigation and recreational to irrigation use only. Water Right No. 9883 was originally authorized for irrigation use and was changed to irrigation and recreational use under an approved change application in 2005. The 2005 change application reduced the authorized quantity so as to not increase consumptive use at that time. Water Right No. 24018 overlaps the place of use and is limited to 70.05 AF when combined with No. 9883 irrigation quantity, so there will be no increase in total irrigation quantity.
(Please show any calculations here.)
14. It is requested that the maximum annual quantity of water be reduced to NO CHANGE (acre-feet or million gallons).
15. It is requested that the maximum rate of diversion of water be reduced to NO CHANGE gallons per minute (____ c.f.s.).
16. The application must include either a topographic map or detailed plat. A U.S. Geological Survey Topographic Map, scale 1:24,000, is available through the Kansas Geological Survey, 1930 Constant Avenue, University of Kansas, Lawrence, Kansas 66047-3726 (www.usgs.gov). The map should show the location of the presently authorized point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. The presently authorized place of use should also be shown. Identify the center of the section, the section lines and the section corners and show the appropriate section, township, and range numbers on the map. In addition the following information must also be shown on the map.
- a. If a change in the location of the point(s) of diversion is proposed, show:
 - 1) The location of the proposed point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. Please be certain that the information shown on the map agrees with the information shown in Paragraph Nos. 9, 10 and 11 of the application.
 - 2) If the source of supply is groundwater, please show the location of existing water wells of any kind, including domestic wells, within 1/2 mile of the proposed well or wells. Identify each well as to its use and furnish name and mailing address of the property owner or owners. If there are no wells within 1/2 mile, please indicate so on the map.
 - 3) If the source of supply is surface water, the names and mailing addresses of all landowner(s) 1/2 mile downstream and 1/2 mile upstream from your property lines must be shown.
 - b. If a change in the place of use is desired, show the proposed place of use by crosshatching on the map. Please be certain that the information shown on the map agrees with the information shown in Paragraph No. 5 of the application.
17. Attach documentation to show the change(s) proposed herein will not impair existing water rights and relates to the same local source of supply as to which the water right relates. This information may include statements, plats, geology reports, well logs, test hole logs, and other information as necessary information to show the above. Additional comments may be made below.
- Change will not impair existing rights as the authorized quantity and rate are not being changed. Change relates to the same local source of supply as no new well is being drilled.
-
-
18. If the proposed change(s) does not meet all applicable rules and regulations of the Kansas Water Appropriation Act, please identify the rules and regulations for which you request a waiver. State the reason why a waiver is needed and why the request should be granted. Attach documentation showing that granting the request will not impair existing water rights and will not prejudicially and unreasonably affect the public interest.

An * after the source of supply indicates a pending application for change under the file number.
 An * after the ID indicates a 15 AF exemption was granted under the file number.
 A "G" in the Batt column indicates the GEO CTR of a battery. A "B" indicates a well in the battery.
 The number in the Batt column is the number of wells in the battery.

Water Rights and Points of Diversion Within 1.00 miles of point defined as:

2150 Feet North and 5070 Feet West of the Southeast Corner of Section 32 T 26S R 1W

Any use of water that is not as authorized by the water right or permit to authorize water before the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than \$100 nor more than \$1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any Owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

I declare that I am an owner of the currently authorized place of use as identified herein, or that I represent all such owners and am authorized to make this application on their behalf, and declare further that the statements contained herein are true, correct, and complete. By filing this application I authorize the chief engineer to permanently reduce the quantity of water and/or rate of diversion as specified in sections 14 and 15 of this application.

Dated at Wichita, Kansas, this 9th day of May, 20 14.

My Commission Expires 8-12-17.

FEE SCHEDULE

Each application to change the place of use, the point of diversion or the use made of the water under this section shall be accompanied by the application fee set forth in the schedule below:

- (1) Application to change a point of diversion 300 feet or less \$100
- (2) Application to change a point of diversion more than 300 feet \$200
- (3) Application to change the place of use \$200
- (4) Application to change the use made of the water \$300

Make check payable to **Kansas Department of Agriculture.**

Leslie;

This seems like a pretty good change app. Cameron and I sat down and cussed and discussed it a bit. I think it is solving an irrigation overpumping problem as well. . Go ahead and approve it.

Jeff

To: Lanterman, Jeff <Jeff.Lanterman@ks.gov>
Subject: FW: Recommendation for Change with PD Update File No. 9883 UMW_Fox Ridge__2_2

Jeff, this seems to be a good idea. The change is allowing more to be used for irrigation and less in the ponds from the most senior water right at this development. There has been some WUR reporting issues in the past that appear to be resolved at this point.

24018 will remain as a rec/irrigation permit and the remaining rec under the file appears to be an adequate amount. The series of ponds also has a surface water component covered by 45882.

I think this can be passed on to Leslie as good to go. Would be best if they meter 24018 rec and irrigation separately, we could include something about that in the cover letter if you think it's appropriate.

Cameron

Subject: Recommendation for Change with PD Update File No. 9883 UMW_Fox Ridge__2_2

I wanted to update the location of the point of diversion per the 2008 compliance investigation. So page 2, paragraph 3 has been updated.

Anyway please let me know if you have any questions and if you'd recommend this change for approval.

Leslie

MEMORANDUM

TO: Files

DATE: March 10, 2017

FROM: Leslie Ireland

RE: Water Right, File No. 9,883

Tiffany Meredith on behalf of Fox Ridge Master Association, has filed an application for approval to change the irrigation and recreational uses of water authorized under the referenced file. The application was received in this office on May 27, 2014. Tiffany Meredith is the Manager of the Home Owners Association (HOA).

The referenced file was in good standing at the time of filing, and had to remit a fine for not filing water use reports. On February 25, 2017, Andy Terhune, Water Use Unit Supervisor was contacted about the required fines and filings. He indicated the water use reporting issues have been resolved.

The owners are requesting to change the right from irrigation and recreational use to all irrigation use. This would result in the 8.28 acre-feet (AF) authorized for recreational use added to the 18.42 AF irrigation use, for a combined total of 26.7 AF for irrigation use.

The right is currently authorized one well located in the NW¼ NW¼ SW¼ of Section 32, with a maximum rate of 300 gallons per minute (gpm) for the diversion of 18.42 acre-feet (AF) for the irrigation use on 46.7 acres and 8.28 AF for the recreational use portion for the filling and maintaining of 6 interconnected reservoirs that have a combined total of 35 surface acres. The point of diversion and places of use are all located in the South half of Section 32, Township 26, Range 1 W, Sedgwick County. The rate is limited to 300 gpm for each use. The places of use have a complete overlap with Water Right, File No. 24,018, that is authorized limited quantity and rate of 70.05 AF for irrigation use and 58.33 AF for the recreational use, both to be diverted at 825 GPM from one (1) well located in the SW¼ NE¼ SE¼ of Section 32, Township 26, Range 1 W, Sedgwick County. This junior right is limited to 825 gpm under any use and has the additional limitation not to exceed its authorized quantities when combined with File No. 9,883. The reservoirs are also authorized under File No. 45,882 for the impounding of surface water and Structure Permits SSG-0459 & SSG-0460.

The requested change will result in File No. 9,883 to be authorized 26.7 AF for irrigation use from the well located in the Southwest Quarter of Section 32. The change will allow the removal of the limitation on the rate. The rate will remain at 300 gpm.

The 35 acres of ponds intercept the groundwater table, but during construction the ponds were lined to prohibit seepage. No quantity was allocated for the seepage. The existing reservoirs were evaluated by K.A.R. 5-6-7, *Determination of average annual potential net evaporation loss*:

$$20 \text{ inches annual evaporation} \div 12 \text{ inches} = 1.67 \text{ feet} \times 35 \text{ acres} = 58.33 \text{ AF}$$

The potential net evaporation per K.A.R. 5-6-3, will remain authorized under File No. 24,018. This right's 58.33 AF for recreational use and limited to that amount with File No. 9,883 can be updated. The additional limitation on the recreational use can be removed, allowing File No. 24,108, to be the sole right for the recreational use. A Findings and Order to remove this limitation will be completed.

The 46.7 irrigated acres as detailed in K.A.R. 5-3-23, *Maximum reasonable annual quantity approvable for irrigation use for an application for change in place of use and a request to reduce a water right*, the quantity reasonable for this area is 1.5 acre-foot per acre as per K.A.R. 5-3-19, *Maximum reasonable annual quantity of water for irrigation use*. A total of 70.05 AF has been historically justified for irrigation use. The change will authorize irrigation quantities of 26.7 AF under File No. 9,883, and 51.63 AF, under File No. 24,018, for a combined total of 78.33 AF, but will remain limited to 70.05 AF under File No. 24,018. This limitation will assure the quantity used to remain reasonable and consumptive use will not increase as required by K.A.R. 5-5-3.

Water Right, File No. 9,883, had a Compliance Investigation completed in October 2008, which determined by GPS protocol the actual well location to be 2,399 feet North and 5,159 feet West of the Southeast corner of Section 32. It appears the location of the point of diversion is approximately 264 feet from authorized. The order will update the location of the authorized point of diversion.

As required by statute well owners, other than those owned by the HOA, that were determined to be located within a quarter ($\frac{1}{4}$) mile of the well authorized by File No. 9,883, were contacted by letter on the proposed change. One call was received inquiring about the letter and one letter was returned by the post office for a bad address. No written comments were received from the notification letters.

The Equus Beds Groundwater Management District No. 2 recommended approval of the referenced application by letter dated March 3, 2015.

Jeff Lanterman, Water Commissioner of the Stafford Field Office, recommended approval of the requested change for File No. 9883 and modification of the additional limitation on File No. 24,018 per his email dated March xx, 2017.

The transmittal letter will reiterate that the quantity utilized per use should be metered so that the quantity diverted may be readily determined. A check valve is required if any chemical or foreign substance is injected into the water through the diversion works. A water level measurement tube and WWC-5 will not be required as no new wells have been authorized. The water use correspondent will remain with its address as sequence #2 in the database.

Based on the above discussion, that consumptive use will not increase and that no change in the local source of supply will occur, it is recommended that the referenced application for File No. 9,883 be approved, and the order for File No. 24,018 be signed.

RE: Water Right, File No. 9,883

Dear Sir or Madam:

This letter is to **provide notice** as required by Kansas Senate House Bill No. 337, which became effective on July 1, 2016.

The owner of the referenced appropriation of water has filed an application for approval of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture.

The application for Water Right, File No. 9,883, proposes a change in use made of water from irrigation and recreational use to only irrigation use at the Fox Ridge Master Association under the referenced file. This change will not alter the authorized quantity of water or rate of diversion that had been historically diverted. The irrigated place of use authorized under File No. 9,883, is located in the Southwest Quarter (SW¼) of Section 32, Township 26 South, Range 1 West, Sedgwick County, Kansas.

If you have any questions, please contact our office, my desk phone is (785) 564-6633. If you wish to discuss a specific file, please have the file numbers ready so that we may help you more efficiently.

Sincerely,

A handwritten signature in cursive script that reads "Leslie Ireland".

Re: Water Right No. 9883 Change Application – Fox Ridge Master Association

Dear Mr. Turney:

The Equus Beds Groundwater Management District No. 2 reviewed the referenced change in use made of water application on March 3, 2015, using the District's Revised Management Program (effective May 1, 1995) and Rules and Regulations K.A.R. 5-22-1 through 5-22-17.

The application proposes to change the use made of water from irrigation and recreational to only irrigation. The District's review found that the change application complies with the District's Revised Management Program (effective May 1, 1995) and Rules and Regulations K.A.R. 5-22-1 through 5-22-17. Based on the review, the change application is recommended for approval by the Equus Beds Groundwater Management District No. 2.

A District decision may be appealed to the District Board of Directors by submitting a written petition to the District office within 30 days from date of this notification, pursuant to K.A.R. 5-22-12.

Please contact the District should you have any questions regarding the review or recommendation.

Sincerely,
EQUUS BEDS GROUNDWATER
