**RE:** Application, File No. 50,315

Rick and Amy Allbright filed the referenced application for a permit to appropriate water for beneficial use, proposing the appropriation of 112 acre-feet of groundwater for irrigation use. The application proposed the geographic center of a four (4) well battery located in the Northwest Quarter of the Northeast Quarter of the Northeast Quarter (NW¼ NE¼ NE¼) of Section 25, more particularly described as being near a point 5,105 feet North and 1,050 feet West of the Southeast corner of said section, in Township 24 South, Range 8 West, Reno County, Kansas.

The proposed point of diversion lays within the boundaries of Groundwater Management District No. 2 (GMD 2). A request for recommendation was sent to GMD 2 on July 15, 2022. A recommendation for denial was received from GMD 2 on June 21, 2022. recommended denial of the application because their review determined that the application did not comply with the District's Safe Yield regulation K.A.R. 5-22-7(a), as existing and proposed consumptive appropriations exceed the maximum allowable. Additionally, the application did not comply with K.A.R. 5-22-14(a)(2), as the quantity of water requested is greater than the maximum reasonable quantity for beneficial use for irrigation in Reno County of 1.4 acre-feet per acre.

A letter was sent to the applicant from DWR on June 23, 2022, notifying the applicant of the recommendation for denial. The applicant was advised that DWR would delay any further action until July 25, 2022, to provide the applicant an opportunity to contact the District to request an appeal and to submit any additional information to the Chief Engineer for consideration. No request for extension or notification of contact with GMD 2 was received from the applicant.

Therefore, based on the existing information, it is recommended that application, File No. 50,315 be denied and dismissed for failure to meet safe yield criteria.
