RE: New Application, File No. 49,638;
Change Applications, Vested Water Right, File No. GE-002;
and Water Right, File Nos. 9,658 and 23,804

The City of Junction City has filed the referenced new application (File No. 49,638) to appropriate 430.123 million gallons (1,320 acre-feet) of groundwater from a proposed new well for municipal use. There are no overlapping files on the proposed point of diversion (which will be designated as City Well No. 20). However, the applicant has multiple water rights that overlap the place of use, including Vested Water Right, File No. GE-02, Water Right, File Nos. 9,658 and 23,804, and Appropriation of Water, File Nos. 49,126; 49,127; 49,128; 49,129; and 49,130. In addition, the City is redrilling one of their municipal supply wells (Well #16) due to a collapsed screen, and has submitted change applications under File Nos. GE-02, 9,658 and 23,804 to change the point of diversion (which will be designated as City Well #19).

The applicant's engineering consultant, (HDR) has provided significant information in support of both the increase in overall quantity of water under the new application, and the change in point of diversion of 125 feet from the existing well.

Vested Water Right, File No. GE-02 is authorized 575 million gallons, and Water Right, File No. 9,658 is authorized 819.019 million gallons limited to 819.019 million gallons when combined with the senior file. Water Right, File No. 23,804 has 10 authorized wells, with a "blanket" rate of diversion and quantity of water, both limited when combined with the senior water rights to 6,925 gpm and 1,529.87 million gallons (4,695 acre-feet) per year. File Nos. 49,126; 49,127; 49,128; 49,129; and 49,130 combined provided an additional 528.73 million gallons for a current authorized total of **2,058.6 million gallons** (6,317.6 acre-feet) per year. Pending Application, File No. 49,638 is requesting 430.123 million gallons at a diversion rate of 1,500 gallons per minute. However, only 32.2 million gallons is additional water, which will increase the City's overall quantity of water from 2,058.6 million gallons to **2,090.8 million gallons** when combined with the senior files. As noted above, this is the City's projected water need in 2056 (see Table 2-4 in supporting data). Their revised engineering report shows that water demands will reach 2,090.8 million gallons by 2056 and population will be 31,718.

The applicant also provided significant supporting information during the processing of senior files, File Nos. 49,126; 49,127; 49,128; 49,129; and 49,130, including an engineering analysis report, to justify the requested increase in both quantity of water and rate of diversion. The information on the municipal use supplemental sheets for these senior files indicated that the City had experienced a significant population growth in the last 20 years from 21,000 to 25,817 in 2013. In both 2011 and 2012, the applicant exceeded both their authorized quantity of water and their authorized rate of diversion under their senior files.

The Kansas Water Office (KWO) has also projected a similar significant expansion with population growth for the City from 21,711 in 2000 to 24,841 in 2040, with a related water demand in 2040 of 1,278 million gallons. The other entities served by the City increases water demand in 2040 to over 1,337 million gallons. The City is likely to surpass the KWO 2040 population estimate in calendar year 2016. The applicant indicates that current water usage is equivalent to 137.9 gallons per capita per day (GPCD). The 2011 Kansas Municipal Water Use publication indicates that the City used an average of 150 GPCD, while the regional average for large public water suppliers in Region 7 was 132 GPCD. Using the City's average value of 150 gpcd, and based on their population projection of 31,718 by 2056 (included in the engineering report), the following estimate for water usage can be determined: $31,718 \times 150 \text{ gallons} \times 365 \text{ days} = 1,736 \text{ million gallons}$. Water sold to other public water suppliers and bulk customers (273.5 million gallons), is also likely to increase substantially. Adding the water sold quantity on to the population projection provides for a projected total of 2,010 million gallons per year. Therefore, based on the City's current usage and projections, the requested quantity of 2,090.8 million gallons per year when all rights are combined appears reasonable.

Based on well information contained in the engineering report, and information from the KGS well completion database, the subsurface lithology is comprised of alternating sand and gravel to depths ranging from 53 feet to 74 feet below ground surface where shale or limestone bedrock is encountered. Static water levels range from 25 feet to 40 feet below ground surface. The engineering report notes that well pumping rates are limited by the relatively thin saturated thickness of the aquifer. The physical location of the wells and the subsurface lithology, indicate that the source of water is the Republican River alluvium.

The area of consideration for the pending new application was based on information from File Nos. 49,126; 49,127; 49,128; 49,129; and 49,130, in order to maintain consistency. This provided a delineation of the extent of the alluvial aquifer (area of consideration) of 6,847 acres, a recharge of 3.2 inches, and with 75% available, a safe yield quantity of 1,369 acre-feet. There are multiple existing water rights in the local area that have appropriated over 7,228 acre-feet (the majority of this quantity is the applicant's senior files). For this pending application, there is no quantity of water available for appropriation. However, per a determination by the Chief Engineer, the applicant's senior water rights are eligible water rights within the Kansas River Water Assurance District No. 1 and they benefit from releases of assurance water. This new well is part of this same well field adjacent to the river. The City has requested a waiver of safe yield. Therefore, because the water requested by this pending application would be supported by Kansas River Water Assurance District No. 1, a **waiver** of safe yield (K.A.R. 5-3-11) is recommended. Releases of storage water from Milford Reservoir will provide adequate recharge to the alluvial source for these wells. A waiver of safe yield for new applications supported by water assurance district releases is consistent with other member applications throughout the state.

As noted above, the proposed point of diversion is a new well, but is part of an existing well field currently authorized under senior water rights (File Nos. GE-02, 9,658 and 23,804). The individual wells were installed to operate as a well field in conjunction with each other, and the individual wells do not meet minimum well spacing criteria to each other per the requirements in K.A.R. 5-4-4, which suggest 1,320 feet well spacing for "all other aquifers". Spacing averages about 500 feet apart for the existing wells. However, K.A.R. 5-4-4 also provides that the spacing guidelines are not applicable if the required minimum well spacing criteria are not necessary to prevent direct impairment. There are several unique circumstances that should be considered in this specific instance.

- The wells in a municipal well field are operated as a system, and are not likely to be separated or divided in any way in the future.
- The wells have historically been operated without evidence of impairing each other.
- In addition, as noted above, these wells are primarily dependent on capturing surface water that infiltrates from the Republican River, especially when water is released by the KRWAD No. 1. The reduced well spacing is a key component to this "hydraulic capture" concept. Typically, well spacing is necessary to prevent overlapping cones of influence, which can lead to impairment concerns. However, based on similar well field designs, these wells are intentionally spaced close together to cause overlapping cones of depression and ultimately create a groundwater trough or sink adjacent to the river. This trough greatly increases the ability to capture surface water. Increasing surface water infiltration to the wells is obviously a benefit to the alluvial aquifer because it will minimize the amount of groundwater directly withdrawn from the aquifer.

Based on the specific design of this well field, the well spacing guidelines in K.A.R. 5-4-4, are clearly not relevant in this instance in regards to the City's municipal well field. The minimum well spacing criteria for the applicant's wells is not necessary to prevent direct impairment since direct interference between well drawdown is the desired outcome of pumping these wells to increase surface water infiltration. The proposed new well and the change in point of diversion complies with well spacing from all other existing wells, which will protect the public interest.

As stated above, the City is redrilling one of their municipal supply wells (Well #16) due to a collapsed screen, and has submitted change applications under File Nos. GE-02, 9,658 and 23,804 to change the point of diversion (the new well will be designated as City Well #19). Both the existing well #16 and the proposed well #19 are located within Special Section 12. The proposed well will be located approximately 125 feet Southeast of the currently authorized well based on the submitted map and information from the applicant. The well location appears to meet spacing requirements of K.A.R. 5-4-4(d)(2) *Well spacing* in that a move of 125 feet will not decrease the distance to other wells or authorized well locations by more than 300 feet.

The same local source of supply will not change, which has been previously determined to be Main Stem Alluvium (113). The referenced water rights do not appear abandoned as per K.S.A. 82a-718. A Certificate of Appropriation was recently issued for Water Right, File No. 23,804 (June 16, 2014).

The Kansas River Water Assurance District No. 1 was notified of the pending new and change applications on August 9, 2016 via electronic mail. No response was received from the KRWAD. In addition, a copy of the applications was sent to the Kansas Water Office for their review and comment. In a letter dated September 28, 2016, the KWO stated that the results of the OASIS model run indicate that there is sufficient assurance reservoir storage to support the requested additional water. DWR Water Management Services staff also recommended approval of the new application in conjunction with the determination by the KWO.

The applicant has submitted a signed Kansas River Assurance District form for the pending new application, which has been properly notarized. By completing this statement, the applicant affirms his/her knowledge that there could be times when the diversion of water may not be allowed under this permit.

Names and addresses of nearby well owners were provided by the applicant, which complies with K.A.R. 5-3-4. One domestic well was located within one-half mile, and a notification letter was sent on October 11, 2016, regarding both the new and change applications. No response of any kind was received. As noted the proposed new well is part of an existing well field that has been in place for many years. Any adjacent well owners would certainly be aware of the City's municipal well field.

The applications were filed indicating that the place of use is the City of Junction City, Kansas and immediate vicinity, an industrial park in the Northeast Quarter (NE $\frac{1}{4}$) of Section 22, a roadside park on Interstate-70 in Sections 16 and 21, Rural Water District No. 1, Geary County, all in Township 12 South, Range 5 East, Geary County, and the City of Grandview Plaza and immediate vicinity, in Township 12 South, Range 6 East, Geary County, Kansas. This place of use is consistent with senior water rights.

In accordance with K.S.A. 82a-706c, the Chief Engineer retains full authority to require any water user to install meters, gages, or other measuring devices, which devices he or she or his or her agents may read at any time. Water flowmeter requirements are further described in K.A.R. 5-1-4 through K.A.R. 5-1-12. If any chemical or foreign substance is injected into the water pumped under this permit, a check valve will also need to be installed.

Based on the above discussion, that the changes are reasonable, that impairment to existing vested rights is unlikely, and that no change in the local source of supply will occur, it is recommended that the referenced change applications be approved.

City of Junction City - Memorandum
File Nos. 49,638; GE-002; 9,658; and 23,804
Page 4 of 4

Katie Tietsort, Water Commissioner of the Topeka Field Office, recommended approval of the referenced new and change applications in an October 24, 2016 discussion. Based on the above discussion, the applications are supported by the Kansas River Water Assurance District No. 1, the additional quantity of water under File No. 49,638 will help the city meet future water demands and address recent over-pumping, there is sufficient assurance water storage in place for the new application, and approval of the applications will not impair senior water rights nor prejudicially or unreasonably affect the public interest, it is recommended that the referenced new and changes applications be approved. The new application will be approved with a waiver of safe yield and appropriate quantity limitations.

Re: Appropriation of Water, File No. 49,638; Vested Water Right, File No. GE 002; and Water Right, File Nos. 9,658 and 23,804

Dear Sir or Madam:

There is enclosed a permit (File No. 49,638) to appropriate water authorizing you to proceed with construction of the proposed diversion works (except those dams and stream obstructions regulated by K.S.A. 82a-301 through 305a), to divert such unappropriated water as may be available from the source and at the location specified in the permit, and to use it for the purpose and at the location described in the permit.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in this permit. A water meter is required and you must install it prior to water being put to beneficial use in order for you to maintain accurate records of water use. The meter should be used to provide the information required on the annual water use report. Failure to notify the Chief Engineer of the Division of Water Resources of the completion of the diversion works within the time allowed, or within any authorized extension of time thereof, will result in the dismissal of this permit. Enclosed is a form which may be used to notify the Chief Engineer that the proposed diversion works have been completed.

All requests for extensions of time to complete diversion works, or to perfect appropriations, must be submitted to the Chief Engineer before the expiration of time originally set forth in the permit to complete diversion works or to perfect an appropriation. If for any reason, you require an extension of time, you must request it before the expiration of time set forth in this permit. Failure to comply with this regulation will result in the dismissal of your permit or your water right. Any request for an extension of time shall be accompanied by the required statutory fee, which is currently \$100.00. There is also enclosed an information sheet setting forth the procedure to obtain a Certificate of Appropriation which will establish the extent of your water right.

In addition, enclosed are Orders executed by the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, approving the Applications for Change in the Point of Diversion under Vested Water Right, File No. GE 002, and Water Right, File Nos. 9,658 and 23,804. Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in these approvals for change.

City of Junction City

File Nos. 49,638; GE-002; 9,658; and 23,804

Page 2

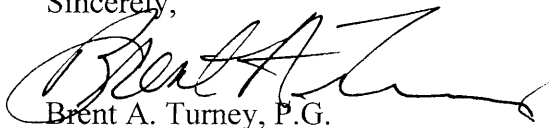

Since these orders modify the original documents referred to above, the approval documents for File Nos. GE 002; 9,658; and 23,804 should be recorded with the Register of Deeds as other instruments affecting real estate. The abandoned well must be plugged in accordance with the requirements of Article 30 of the Rules and Regulations as adopted by the Kansas Department of Health and Environment.

These Orders are final agency actions. If you choose to appeal this decision or any finding or part thereof, you must do so by filing a petition for review in the manner prescribed by the Kansas Act for Judicial Review and Civil Enforcement of Agency Actions (KJRA K.S.A. 77-601 et seq.) within 30 days of service of these Orders. Your appeal must be made with the appropriate district court for the district of Kansas.

The Chief Legal Counsel for the Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, Kansas 66502, is the agency officer who will receive service of a petition for judicial review on behalf of the Kansas Department of Agriculture, Division of Water Resources. If you have questions or would like clarification concerning these orders, you may contact the Chief Engineer.

If you have any questions, please contact our office. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Brent A. Turney, P.G.

**APPROVAL OF APPLICATION
FOR
CHANGE IN POINT OF DIVERSION
VESTED RIGHT
FILE NO. GE 002**

FILE COPY

The Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, after due consideration of the written application of Allen J. Dinkel, City Manager, on behalf of the City of Junction City, Kansas, 700 N. Jefferson, P.O. Box 287, Junction City, Kansas, 66441, received in this office on May 18, 2016, for approval of a change in the point of diversion under the vested right order, determining and establishing a vested right to continue the beneficial use of water, then identified in the office of the Chief Engineer as Vested Right, Code 622, Geary County, now identified as Vested Right, File No. GE 002, as modified and amended by the Correctional Order of the Chief Engineer dated January 7, 1977, correcting an error in the legal description of the tract of land upon which the point of diversion is located, by the Order of the Chief Engineer dated June 23, 1981, approving the application to change the point of diversion and place of use, by the Findings and Order of the Chief Engineer dated May 26, 1982, to establish a more precise legal description of the tract of land upon which the point of diversion is located, by the Order of the Chief Engineer dated September 26, 1990, approving the application to change the point of diversion and place of use, by the Order of the Chief Engineer dated April 7, 1993, approving the application to change the point of diversion, by the Correctional Order of the Chief Engineer dated May 24, 2006, correcting an error in the description of the authorized place of use, and by the Order of the Chief Engineer dated August 27, 2007, approving the application to change the point of diversion, finds that the change is reasonable and will not impair existing rights, that the change relates to the same local source of supply and that the application should be and is hereby approved.

The effective date of the change shall be the date this order is executed by the Chief Engineer, after which the authorized locations of the points of diversion shall be:

one (1) well, identified by the City of Junction City as Well No. 19, located in Special Section 12, more particularly described as being near a point 515 feet North and 965 feet West of the Southeast corner of Section 35, in Township 11 South, Range 5 East,

one (1) well, identified by the City of Junction City as Well No. 17, located in the Southwest Quarter of the Southwest Quarter of the Southwest Quarter (SW $\frac{1}{4}$ SW $\frac{1}{4}$ SW $\frac{1}{4}$) of Section 36, more particularly described as being near a point 88 feet North and 5,024 feet West of the Southeast corner of said section, in Township 11 South, Range 5 East,

one (1) well, identified by the City of Junction City as Well No. 18, located in Special Section 11, more particularly described as being near a point 5,010 feet North and 4,310 feet West of the Southeast corner of Section 1, in Township 12 South, Range 5 East, and

one (1) well, identified by the City of Junction City as Well No. 6, located in Special Section 11, more particularly described as being near a point 4,873 feet North and 4,564 feet West of the Southeast corner of Section 1, in Township 12 South, Range 5 East,

all in Geary County, Kansas, located substantially as shown on the map accompanying the application to change the point of diversion.

That the applicant shall submit to the Chief Engineer a copy of the well log required by the Kansas Department of Health and Environment under the authority of K.S.A. 82a-1212, currently form WWC-5, within 30 days following the drilling of the well at the location authorized herein.

Installation of the works for diversion of water shall be completed on or before December 31, 2017, or within any authorized extension of time. The applicant shall notify the Chief Engineer of the Division of Water Resources, Kansas Department of Agriculture, when construction of the works for diversion has been completed.

All diversion works shall be equipped with an in-line, automatic, quick-closing check valve capable of preventing pollution of the source of the water supply. The type of valve installed shall meet specifications adopted by the Chief Engineer and shall be maintained in an operating condition satisfactory to the Chief Engineer. All wells with a diversion rate of 100 gallons per minute or more drilled under the authority of this order shall have a tube or other device installed in a manner acceptable to, and in accordance with specifications adopted by, the Chief Engineer. This tube or device shall be suitable for making water level measurements and shall be maintained in a condition satisfactory to the Chief Engineer.

The water right owner shall properly install acceptable water meters on the diversion works authorized under this water right, prior to the use of water, in strict accordance with the Kansas Administrative Regulations 5-1-4 through 5-1-12 adopted by the Chief Engineer. The water right owner shall notify the Chief Engineer when installation of the water meters has been completed. The water right owner shall maintain the water meters in an operating condition satisfactory to the Chief Engineer, at all times during diversion of water and shall maintain records from which the total quantity of water diverted may be determined. The water right owner shall also report the reading of said water meters and the total quantity of water diverted annually to the Chief Engineer. Such records shall be furnished to the Chief Engineer by March 1 following the end of each calendar year.

In all other respects, the vested right order, determining and establishing a vested right to continue the beneficial use of water, identified in the office of the Chief Engineer as Vested Right, File No. GE 002, is as stated and set forth in the vested right order executed by the Chief Engineer on July 30, 1954, as modified and amended by the aforementioned orders.

This Order shall become a final agency action, as defined by K.S.A. 77-607(b), without further notice to the parties, if a request for hearing or a petition for administrative review is not filed as set forth below.

Request for Hearing. According to K.A.R. 5-14-3(c), any party who desires a hearing must submit a request within 15 days after the date shown on the Certificate of Service attached to this Order. Filing a request for a hearing will give you the opportunity to submit additional facts for consideration, contest any findings made by the Chief Engineer or present any other information you believe should be considered in this matter. A timely-filed request for hearing will stay the deadline for requesting administrative review of this Order pending the outcome of the hearing.

CERTIFICATE OF SERVICE

On this 4th day of November, 2016, I hereby certify that the foregoing Approval of Application for Change in Point of Diversion, Vested Water Right, File No. GE 002, dated November 1, 2016 was mailed postage prepaid, first class, US mail to the following:

Re: Pending New Application, File No. 49,638; and
Change in Point of Diversion Applications, File Nos. GE 002; 9,658 and 23,804

Dear Mr. Biery:

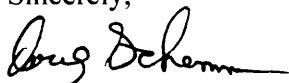

This is to advise you that the City of Junction City has filed the new application referenced above for a permit to appropriate groundwater from a proposed new well (designated as City Well #20), adjacent to the Republican River. This well is adjacent to the City's existing wellfield currently authorized under Vested Water Right, File No. GE-02, and Water Right, File Nos. 9,658 and 23,804. Note that the requested quantity of water under the new application would be limited to these senior files to a total of 2,090.8 million gallons, which will provide 32.2 million gallons of additional water under this new application. The City of Junction City is currently a benefitting member of the Kansas River Water Assurance District No. 1.

In addition, the City of Junction City has filed applications for approval to change the point of diversion for File Nos. GE 002; 9,658 and 23,804. One of the City's current wells authorized under these water rights, City Well No. 16 is no longer operational, and the City is proposing to replace this well with a new well (designated as City Well #19). This new well would be located 125 feet southeast of the current well. Copies of the new and change applications are enclosed.

As you know, the Kansas River Water Assurance Program Operations Agreement states, in part, that "the District reserves the right to review all new applications to appropriate water and change applications, filed with the Division of Water Resources that propose the diversion of water from the Kansas River or its alluvium within the District boundaries". Therefore, you are being notified of receipt of these applications in order that you may be fully informed of the proposed location of the applicant's points of diversion and proposed use of water.

If you have any questions, please contact me at (785) 296-3495. If you wish to discuss a specific file, please have the file number ready so that I may help you more efficiently.

Sincerely,

Doug Schemm

3. The change(s) proposed herein are desired for the following reasons (please be specific): Current City Well #16 has a damaged well screen and needs to be replaced. The City proposes to move the point of diversion associated with Well #16 a distance of 125 feet to the southeast of its present location. As per KDHE well naming conventions, the new well will be designated Well #19.

The change(s) (was) (will be) completed by _____ December 31, 2017
(Date)

12. The presently authorized use of water is for Municipal purposes.
It is proposed that the use be changed to _____ purposes.

13. If changing the place of use and/or use made of water, describe how the consumptive use will not be increased.

(Please show any calculations here.)

14. It is requested that the maximum annual quantity of water be reduced to _____ (acre-feet or million gallons).

15. It is requested that the maximum rate of diversion of water be reduced to _____ gallons per minute (_____ c.f.s.).

16. The application must include either a topographic map or detailed plat. A U.S. Geological Survey Topographic Map, scale 1:24,000, is available through the Kansas Geological Survey, 1930 Constant Avenue, University of Kansas, Lawrence, Kansas 66047-3726 (www.usgs.gov). The map should show the location of the presently authorized point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. The presently authorized place of use should also be shown. Identify the center of the section, the section lines and the section corners and show the appropriate section, township, and range numbers on the map. In addition the following information must also be shown on the map.

- a. If a change in the location of the point(s) of diversion is proposed, show:
 - 1) The location of the proposed point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. Please be certain that the information shown on the map agrees with the information shown in Paragraph Nos. 9, 10 and 11 of the application.
 - 2) If the source of supply is groundwater, please show the location of existing water wells of any kind, including domestic wells, within 1/2 mile of the proposed well or wells. Identify each well as to its use and furnish name and mailing address of the property owner or owners. If there are no wells within 1/2 mile, please indicate so on the map.
 - 3) If the source of supply is surface water, the names and mailing addresses of all landowner(s) 1/2 mile downstream and 1/2 mile upstream from your property lines must be shown.
- b. If a change in the place of use is desired, show the proposed place of use by crosshatching on the map. Please be certain that the information shown on the map agrees with the information shown in Paragraph No. 5 of the application.

17. Attach documentation to show the change(s) proposed herein will not impair existing water rights and relates to the same local source of supply as to which the water right relates. This information may include statements, plats, geology reports, well logs, test hole logs, and other information as necessary information to show the above. Additional comments may be made below.

See Attached

18. If the proposed change(s) does not meet all applicable rules and regulations of the Kansas Water Appropriation Act, please identify the rules and regulations for which you request a waiver. State the reason why a waiver is needed and why the request should be granted. Attach documentation showing that granting the request will not impair existing water rights and will not prejudicially and unreasonably affect the public interest.

Any use of water that is not as authorized by the water right or permit to authorize water **before** the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than \$100 nor more than \$1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any Owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

I declare that I am an owner of the currently authorized place of use as identified herein, or that I represent all such owners and am authorized to make this application on their behalf, and declare further that the statements contained herein are true, correct, and complete. By filing this application I authorize the chief engineer to permanently reduce the quantity of water and/or rate of diversion as specified in sections 14 and 15 of this application.

Dated at Junction City, Kansas, this 4th day of May, 2016.

Note: In the Aug 2014 applications submittals for Files Nos. 49126 through 49130, an industrial well had been located from KGS WWCS records as being located within the 1/2 mile radius. However, this 2007 well for Midwest Concrete Materials was later found to be a driller locating error as this well is actually a DWR point of diversion for File No. 46435 and is located a mile northwest of the Junction City well field.

RE: File No. GE 2

Dear Sir or Madam:

An application for approval of the Chief Engineer to change the following condition or conditions of the file number referred to above has been received:

- place of use
- point of diversion
- use made of water

As a matter of record, the Division of Water Resources has on hand a large number of applications awaiting processing. Therefore to be fair to all concerned, and so that we can process those applications on hand in the order they were received, we intend to concentrate on the backlog of applications until the issue is resolved. You will be contacted regarding this application as soon as it has been examined.

In accordance with the provisions of the Kansas Water Appropriation Act, a portion of which is included below, the use of water prior to approval of the application is unlawful. You should not proceed and divert water as indicated by your plans in your application for a change for this file until you receive approval for this change from the Chief Engineer. Once approved, compliance with the terms, conditions and limitations of the permit is necessary. Conservation of the water resources of Kansas is required.

Section 82a-728 of the Kansas Water Appropriation Act, provides (a) except for the appropriation of water for the purpose of domestic use, . . . it shall be unlawful for any person to appropriate or threaten to appropriate water from any source without first applying for and obtaining a permit to appropriate water in accordance with the provisions of the Water Appropriation Act or for any person to violate any condition of a vested right, appropriation right or an approved application for a permit to appropriate water for beneficial use.

(b) (1) The violation of any provision of this section by any person is a class C misdemeanor...

A class C misdemeanor is punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. Each day that the violation occurs constitutes a separate offense.

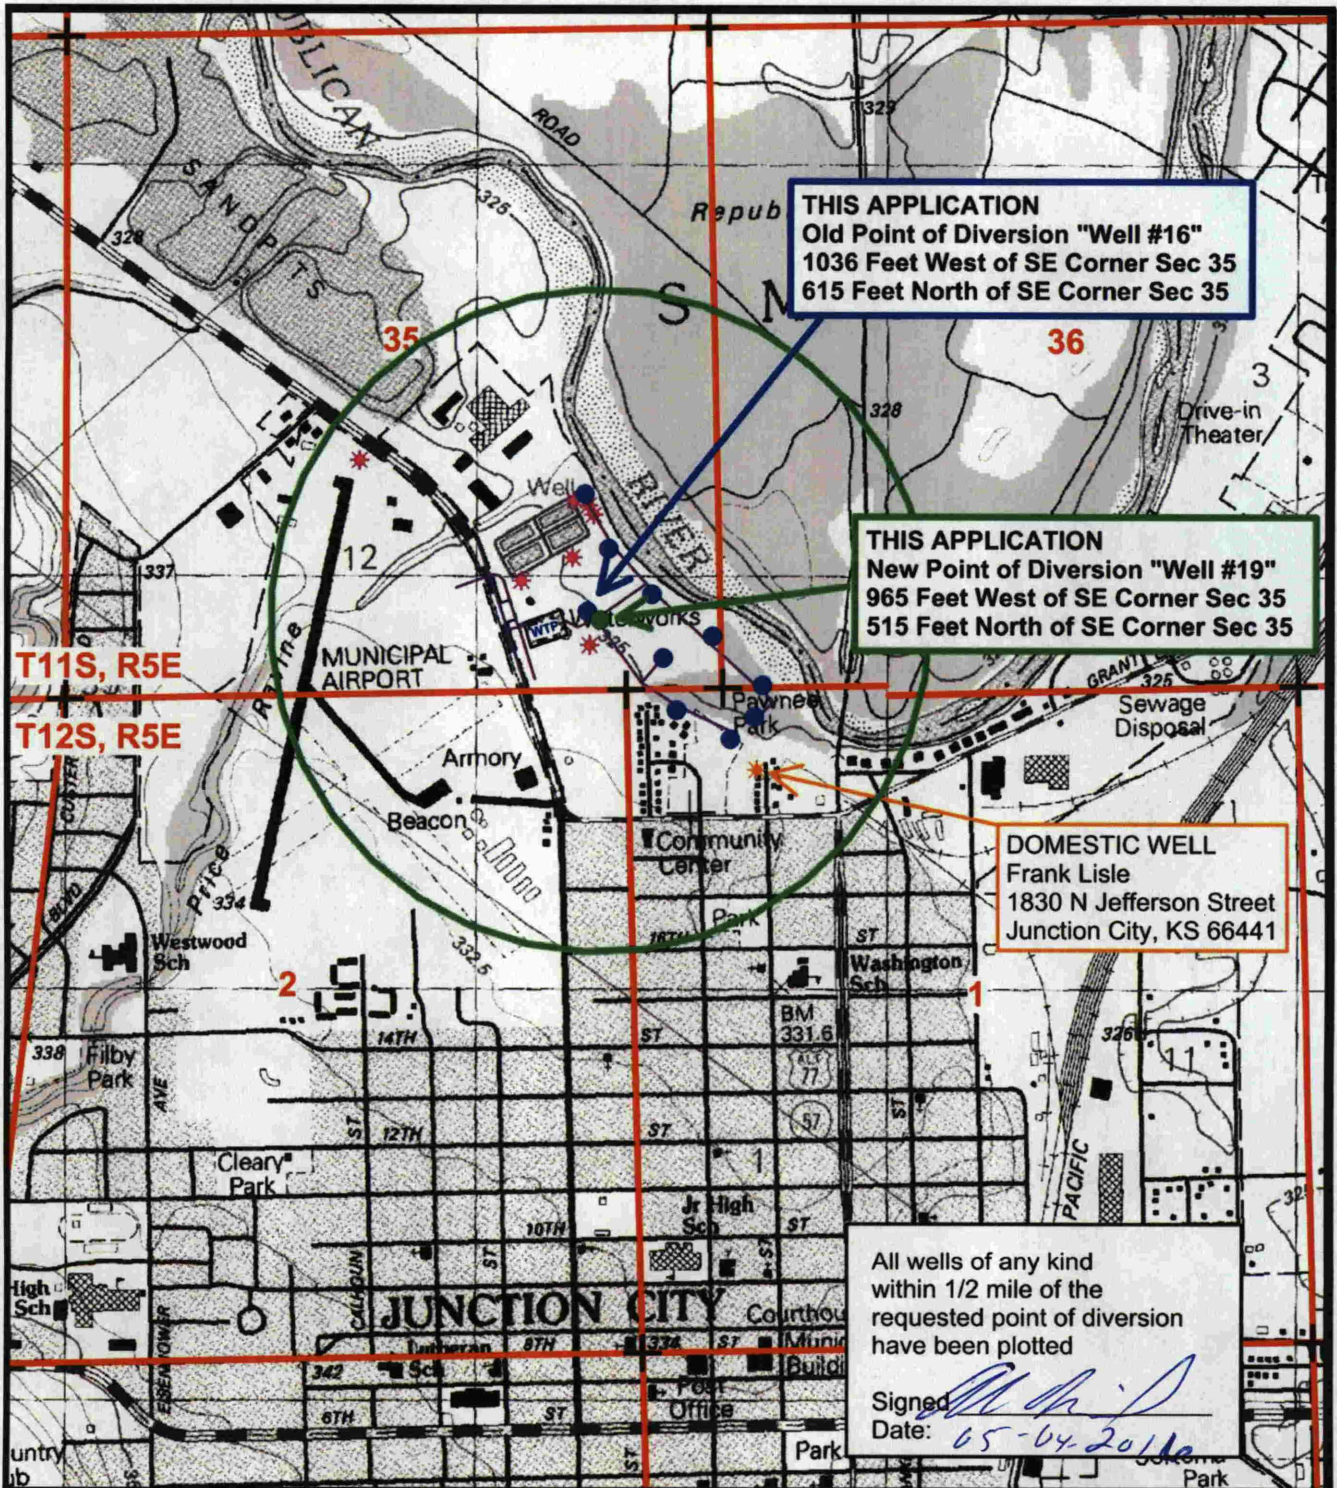

If you have any questions, please contact me at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Brent A Turney, L.G.
