RE: Application, File No. 50,460

Precision Farms has filed the application referred to above for a permit to appropriate 510 acre-feet of surface water at a rate not to exceed all natural flows of Pony Creek Trib 2, in the South Fork Big Nemaha drainage basin. The applicant is proposing to re-divert 510 acre-feet of the stored water for irrigation use at a proposed rate of 2,000 gallons per minute. The proposed point of diversion is the center line of a dam located in the Northwest Quarter of Section 21, Township 1 South, Range 16 East, in Brown County. The applicant has signed the application form stating he has access to the point of diversion. There are no overlapping files in point of diversion.

However, there are multiple overlapping files in Place of Use, including: File Nos. 43,094; 43,261; 47,156; 48,008; 48,770; 48,771; and new applications, File Nos. 49,974; 50,061; 50,152 and 50,277, which will form a complete overlap in the total place of use of 2,994.7 acres after processing change in place of use applications under the existing files. In addition, note that File Nos. 49,878 and 50,065 are a partial overlap in place of use with all other files (820 acres). These 2 files are not connected to the pipeline associated with the other project files and cannot physically serve any other portion of the expanded place of use. File No. 50,065 will pump into the reservoir authorized under File No. 49,878 only and will only be able to supply water to the specified 820 acres included in the total place of use of 2,994.7 acres. The existing permits and new applications are summarized below:

File No.	PD Type	Storage		Direct Use		Limitations
		Quantity (AF)	Rate (GPM)	Quantity (AF)	Rate (GPM)	
43,094	Reservoir	35	Natural Flows	21	855	None

50,152	Reservoir	480	Natural Flows	480	2000	None
50,277	Reservoir	353	Natural Flows	315	2000	None
50,460	Reservoir	510	Natural Flows	510	2000	None

Summing up water rights, 655 AF (limitation qty) + 136 AF + 160 AF + 673 AF + 480 AF + 315 AF + 510 AF = 2,929 AF total for the files the cover the entire place of use of 2,994.7 acres. File Nos. 49,878 and 50,065 provide a total of 537 AF on the 820-acre portion of the place of use.

The maximum quantity of water considered to be reasonable for irrigation of 2,994.7 acres is 2,994.7 acre-feet (1.0 acre-feet per acre in Brown County), per K.A.R. 5-3-24. The applicant has indicated that he will meter water pumped into and out of the various reservoirs in order to properly account for water.

Based on nearby surface water files, this local area of the state will provide for 16 inches of runoff per acre. The 546-acre drainage area will provide for 728 acre-feet of runoff in 1 out of every five (5) years (a 20% chance). The applicant's upstream reservoir (File No. 48,008 is authorized 178.6 AF of storage) and Pony Creek Watershed District #78 upstream reservoir (File No. 47,034) is authorized 5 acre-feet of storage. Subtracting this existing storage quantity of 183.6 AF from the runoff total of 728 AF, provides for 544.5 AF of run-off, which exceeds the requested quantity. Therefore, per K.A.R. 5-6-5, the runoff quantity is not the limiting factor, and the application was processed with the requested 510 acre-feet. The proposed direct use quantity of 510 acre-feet, is equivalent to 6 times the capacity (85 AF), which is slightly above the normal "rule of thumb" of direct use quantity being no more than 5 times capacity for reasonable storage quantity. However, it is still reasonable.

The applicant identified three downstream and upstream landowners within one-half (½) mile of the property lines. Nearby landowner letters were sent out on March 19, 2021, and no responses of any kind were received. There are multiple other surface water rights within a two-mile radius according to the WRIS database. The majority are other reservoirs on different tributary streams. The applicant's senior file 48,008 authorizes an upstream reservoir on this same tributary stream, and would not be impacted by this downstream storage and redirection of water. No senior water rights will be impaired with approval of this application.

Please note that Pony Creek is located within the South Fork Big Nemaha drainage basin, the eastern portion of which drains surface water directly from Kansas toward the Sac and Fox Nation of Missouri in Kansas and Nebraska, and the Iowa Tribe of Kansas & Nebraska Reservation. However, Pony Creek is located in the middle portion of the drainage basin, and surface water flows into the State of Nebraska for several miles, not directly from Kansas land onto Nation or Tribal land. Therefore, no notification of tribe or nation is required.

In a March 23, 2021 e-mail, Katie Tietsort, Water Commissioner, Topeka Field Office, stated that the referenced new application should be approved in conjunction with the pending changes on the senior files. Based on the above discussion, that this area is open to new appropriations, the proposed appropriation of water is reasonable, and senior rights will not be impacted, it is recommended that the referenced new application be approved, in conjunction with changes on senior files and other pending new applications.

Doug

So I have attached a sketch over this map of where the line runs. Each of the circles is a metering point that meters the water from 43261 into each of the sites so we can keep track of what is going on. Hope that helps.

Just FWI on the bottom of the map to the left side below section 29 you will see a blue line drawn east and west. I must of put it there but couldn't figure out how to erase it so disregard that!!

Thanks Keith

Keith,

I have attached a map to indicate how quantities for each of these files would be determined based on the information you provided below.

Can you please review the map and make any modifications or additions that you wish. Anything you can add to further clarify things would be great.

Thank you,

Doug

Doug

Looks good I will start from the north and work south and explain what we have

File 48770 and 50061 There is a meter for this pump and only serve this point. This has a pipe that dump directs into pond can go nowhere else so all this water has to leave through file 43261 and 48771 to go the the fields
File 43261 and 48771 there is a meter at pump here that serves for this diversion only
File 47156 meter is at center point of this pivot and will get moved to the pump if we connect this farm to the pipe line right now the only water able to go to this pivot come from this pump there is a discharge meter where water flows into pond from file 43261 or 48771 but as for now has to go through the pond to get to pivot.
File 49974 is not built yet but will have meter at pump
File 50152 can pump to all and there is a meter there going out of pump and one coming in for when we pump pond pack full from file 43261 ect
File 43094 has its own meter and stand alone
File 48008 has meter at pump going out of pond and one coming into pond from file 43261 ect
File 49878 meter at pump and can only be applied to the 2 pivots at that site Pipe line does NOT connect there is a incoming meter for when 43261 dump in there
File 50065 is not delvopled
File 50277 has meter at pump site metering all water leaving site and also a return meter if water comes back in from 43261

Hope this helps and don't confuse I could try to draw this out if needed on a map

Happy thanks giving talk next week

Keith

Keith,
I've put this together. Can you please add anything else that may help us understand the metering?
Like are you putting separate meters on the pump site or one of the ponds, etc. Anything you can add would be great.
Have a wonderful Thanksgiving,
Doug

So at each source there is a meter and it's a forward and reverse meter so counts a totalizer each way(separate from eachother) We have lots of other meters on site to account for where we are send water but those should be the only one that really matter. We do have a separate meter on the pipe that dumps down to Menolds clear south site that is not a complete overlap!! Is that sufficient or would you like more explanation ect.

Thanks so much!!

Hello Keith, I've pretty much got the big project ready to move on to HQ for review. However, could you possibly provide some metering diagrams and a discussion of how this project will operate? We need to know how to account for the water from each of the multiple sources.
Thanks, Doug

Hello Keith, I'm moving this along. One final go over, File No. 43,094 will be a PU and Use made of water change to IND use at the greenhouses (I sent you the UMW change). File Nos. 50,065 and 49,878 (down south pump site Terrapin Creek and reservoir) will stay on the Dietrich/Menold ground only (860 acres). All other new apps and changes will be complete overlap on the 3,035 acres. Does that sound right?
Thanks, Doug

My only comment is this. When we talk about the limitation to 820 af I don't believe that it affects the overall additional quantity when it comes to the entire place of use. Obviously it has an affect when it comes to the specific 820 acre place of use but WRIS can only track one additional quantity. So 49878 would be all additional in my mind when we look at the series of water rights whether or not they cover the entire place of use or only the 820 acre place of use only. They are overlapping in some fashion so they should be additive as we work our way through the water right chain. The limitation to 820 af is the classic limitation that cannot be administered because we have no way of knowing how much they applied to any particular part of the place of use. When we look at these rights in a series as they apply partially or fully to the entire place of use, all of them are all additional until we get to file no. 50460. At that point we cross over and end up with more than 1 af/acre on the 2994.7 acre place of use. The limitation to 2994.7 af would be correct under 50460. In combination overall, File No. 50460 would be 38.7 af additional.

This spreadsheet makes it much easier to go through this -package and shows an explanation of sorts about what is going on here.

I hate to say it, but I come up to some different values. I have looked at this several days because no one else has disagreed with your chart, but I keep coming up with a consistent set of different values. Honestly, this package is really complicated and io may be going off the track somewhere but can you all take a look at what I put in red and my explanation on the second page I added also in red and see what you think?

Cc: Baum, Kristen [KDA] <Kristen.Baum@ks.gov>
Subject: RE: Grimm Big Project 50065

Here is my two cents.

When we get down to 48770 it has a limitation to 655 af when combined with 43094; 43261 & 47156. That makes 48770 an additional 447 af to the files mentioned in the limitation. However, when it comes to File No. 48008 it is all additional so the sub total below 48770 should be (655 af + 394af = 1049 af). We would end up with the same sub total for 48771.

I agree that there should be a (goofy) limitation under 49878. It would have to read something like "Limited to 820 AF when combined with File Nos on the land described herein. We have to have the words on the land described herein, otherwise, we would start limiting how the files operate in combination with each other in an incorrect manner. 50065 and 50460 will need the same limitation.

I am not begging to be in on your Monday chat, but I will if needed.

Brett

So based on the possibility of all these new files overlapping the Partial Overlap, I came up with this. Only the last file needs an additional limitation to the overall quantity for the entire acreage.

Subject: RE: Grimm Big Project 50065

So if I understand his map correctly, there is a total number of files of 13 that are the final number of files involved in any way under this project.

11 files overlap on ALL the land.

There are 2 files with partial overlaps on 820 acres of the larger 2994.7 Acre place of use.

So I started working through this the way we did for Wietharn, but I am already running into problems at 49878... the Q authorized up to that point is greater than the value of the acres and the AF/A can be exceeded that file will cover so it needs a limitation added, right?

$$\begin{array}{r}

Subject: Grimm Big Project 50065

Here's the proposed limitation on the junior pump site file No. 50,065 that will only supply water to the specified 820 acres.

21. That the quantity of water approved under this permit is further limited to the quantity which combined with Water Right, File Nos. 43,094 and 43,261; and Appropriation of Water, File Nos. 47,156; 48,008; 48,770; 48,771; 49,878; 49,974; and 50,061, will provide a **total not to exceed 820 acre-feet** of water per calendar year for irrigation use on the land described herein.

File No.	PD Type	Storage		Direct Use		Current Limitations	Proposed Limitations / Comments
		Quantity (AF)	Rate (GPM)	Quantity (AF)	Rate (GPM)		
43,094	Reservoir	35	Natural Flows	21	855	None	
43,261	Reservoir	56.5	Natural Flows	41	915	None	
47,156	Reservoir	189.5	Natural Flows	146	1000	None	
48,008	Reservoir	178.6	Natural Flows	136	1200	None	
48,770	Pump site	--- --	--- --	655 (447 Add)	1500	Direct Use: 655 AF/YR com/w #43,094; 43,261; & 47,156	
48,771	Reservoir	579	Natural Flows	579 (0 Add)	1000	Direct Use: 655 AF/YR com/w #43,094; 43,261; 47,156; & 48,770	File No. 48,008 not included in overall limitation. Therefore, total to this point would be 655 AF + 136 AF = 791 AF.
49,878	Reservoir	270	Natural Flows	267	1200	None (820 ACRE PU)	Limitation: 820 AF when combined with all senior files on the authorized place of use of 820 acres described in this permit.
PENDING APPLICATIONS							
49,974	Reservoir	160	Natural Flows	160	1000		Limitation: 820 AF when combined with all senior files on the 820 acres in the West Half of Sections 21; 28; & 33 as described herein.
50,061	Pump site	--- --	--- --	673	1500		Limitation: 820 AF when combined with all senior files on the 820 acres in the West Half of Sections 21; 28; & 33 as described herein.
50,065	Pump site	--- --	--- --	270	2000	(820 ACRE PU)	Limitation: 820 AF when combined with all senior files on the 820 acres in the West Half of Sections 21; 28; & 33 as described in this permit.

3. That the appropriation sought shall be limited to all natural flows of an unnamed tributary to Pony Creek, designated in the office of the Chief Engineer as Pony Creek Trib 2 (SF Big Nemaha), not needed to satisfy all vested rights and prior appropriation rights to be incrementally accumulated as reservoir storage space becomes available to a maximum extent of **510 acre-feet** per calendar year in one (1) reservoir created by a dam located in the Northeast Quarter of the Northwest Quarter of the Northwest Quarter (NE $\frac{1}{4}$ NW $\frac{1}{4}$ NW $\frac{1}{4}$) of Section 21, more particularly described as being near a point 5,145 feet North and 4,265 feet West of the Southeast corner of said section, in Township 1 South, Range 16 East, Brown County, Kansas, to provide **510 acre-feet** of water as needed for direct irrigation use to be withdrawn, released or otherwise diverted from the reservoir at a re-diversion rate of approximately **2,000 gallons per minute (4.46 c.f.s.)**. A reasonable maximum re-diversion rate will be established during the perfection period and assigned at certification.

4. That installation of works for diversion of water shall be completed on or before **December 31, 2022** or within any authorized extension thereof. The applicant shall notify the Chief Engineer and pay the statutorily required field inspection fee, which is currently \$400.00, when construction of the works has been completed. Failure to timely submit the notice and the fee will result in revocation of the permit. Any request for an extension of time shall be submitted prior to the expiration of the deadline and shall be accompanied by the required statutory fee, which is currently \$100.00.

5. That the proposed appropriation shall be perfected by the actual application of water to the proposed beneficial use on or before **December 31, 2026** or any authorized extension thereof. Any request for an extension of time shall be submitted prior to the expiration of the deadline and shall be accompanied by the required statutory fee, which is currently \$100.00.

6. That the applicant shall not be deemed to have acquired a water appropriation for a quantity in excess of the amount approved herein nor in excess of the amount found by the Chief Engineer to have been actually used for the approved purpose during one calendar year subsequent to approval of the application and within the time specified for perfection or any authorized extension thereof.

7. That the use of water herein authorized shall not be made so as to impair any use under existing water rights nor prejudicially and unreasonably affect the public interest.

8. That the right of the appropriator shall relate to a specific quantity of water and such right must allow for a reasonable raising or lowering of the static water level and for the reasonable increase or decrease of the streamflow at the appropriator's point of diversion.

9. That this permit does not constitute authority under K.S.A. 82a-301 through 305a to construct any dam or other obstruction; nor does it grant any right-of-way, or authorize entry upon or injury to, public or private property.

10. That all re-diversion works constructed under the authority of this permit into which any type of chemical or other foreign substance will be injected into the water pumped from the re-diversion works shall be equipped with an in-line, automatic quick-closing, check valve capable of preventing pollution of the source of the water supply. The type of valve installed shall meet specifications adopted by the Chief Engineer and shall be maintained in an operating condition satisfactory to the Chief Engineer.

11. That an acceptable water flow meter shall be installed and maintained on the re-diversion works authorized by this permit in accordance with the Kansas Administrative Regulations 5-1-4 through 5-1-12 adopted by the Chief Engineer. This water flow meter shall be used to provide an accurate quantity of water diverted as required for the annual water use report (including the meter reading at the beginning and end of the report year).

12. That the applicant shall maintain accurate and complete records from which the quantity of water diverted during each calendar year may be readily determined and the applicant shall file an annual water use report with the Chief Engineer by March 1 following the end of each calendar year. Failure to file the annual water use report by the due date shall cause the applicant to be subject to a civil penalty.

13. That no water user shall engage in nor allow the waste of any water diverted under the authority of this permit.

14. That failure without cause to comply with provisions of the permit and its terms, conditions and limitations will result in the forfeiture of the priority date, revocation of the permit and dismissal of the application.

15. That the right to appropriate water under authority of this permit is subject to any minimum desirable streamflow requirements identified and established pursuant to K.S.A. 82a-703c for the source of supply to which this water right applies.

16. That the quantity of water approved under this permit is further limited to the quantity which combined with Water Right, File Nos. 43,094 and 43,261; and Appropriation of Water, File Nos. 47,156; 48,008; 48,770; 48,771; 49,878; 49,974; 50,061; 50,065; 50,152 and 50,277 will provide a **total not to exceed 820 acre-feet** of water per calendar year for irrigation use on the land in the West Halves of Sections 21, 28 and 33 as described herein.

17. That the quantity of water approved under this permit is further limited to the quantity which combined with Water Right, File Nos. 43,094 and 43,261; and Appropriation of Water, File Nos. 47,156; 48,008; 48,770; 48,771; 49,878; 49,974; 50,061; 50,065; 50,152 and 50,277 will provide a **total not to exceed 2994.7 acre-feet** of water per calendar year for irrigation use on all land described herein.

Ordered this 1st day of July, 2021, in Manhattan, Riley County, Kansas.

RIGHT TO A HEARING AND TO ADMINISTRATIVE REVIEW

If you are aggrieved by this Order, then pursuant to K.S.A. 82a-1901, you may:

- 1) request an evidentiary hearing before the Chief Engineer, or
- 2) request administrative review by the Secretary of Agriculture.

Failure to request an evidentiary hearing before the Chief Engineer does not preclude your right to administrative review by the Secretary.

To obtain an evidentiary hearing before the Chief Engineer, a written request for hearing must be filed within 15 days after service of this Order as provided in K.S.A. 77-531 (**i.e., within a total of 18 days after this Order was mailed to you**), with: Kansas Department of Agriculture, Attn: Legal Section, 1320 Research Park Drive, Manhattan, Kansas 66502, FAX (785) 564-6777.

If you do not file a request for an evidentiary hearing before the Chief Engineer, you may petition for administrative review of the Order by the Secretary of Agriculture. A petition for review shall be in writing and state the basis for requesting administrative review. The request for hearing may be denied if the request fails to clearly establish factual or legal issues for review. See K.S.A. 77-527. The petition must be filed within 30 days after service of this Order as provided in K.S.A. 77-531 (**i.e., within a total of 33 days after this Order was mailed to you**), and be filed with: Secretary of Agriculture, Attn: Legal Division, Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, Kansas 66502, FAX (785) 564-6777.

If neither a request for an evidentiary hearing nor a petition for administrative review is filed as set forth above, then this Order shall be effective and become a final agency action as defined in K.S.A. 77-607(b). Failure to timely request either an evidentiary hearing or administrative review may preclude further judicial review under the Kansas Judicial Review Act.

RE: Appropriation of Water, File No. 50,460

Dear Mr. Grimm:

Enclosed is a permit authorizing you to proceed with construction of the proposed diversion works and to appropriate water for beneficial use as set forth in the permit. Your attention is directed to the enclosures and to the terms, conditions, limitations, and requirements specified in this permit.

Notice must be filed on the enclosed form once the diversion works have been completed. Failure to complete the diversion works within the time allowed, or within any authorized extension of time thereof, will result in dismissal of this permit. If you need an extension of time, you must request it before the deadline for completion set forth in the permit. Any request for an extension of time must be accompanied by the statutorily required fee, which is currently \$100.00.

An acceptable water flowmeter must be installed on the re-diversion works authorized by this permit prior to using water. An annual water use report must be filed with the Chief Engineer by March 1, following the end of each calendar year. If a complete annual water use report is not received by the deadline, then a fine may be assessed and all water use under such permit or right may be suspended. Reports submitted in paper form will be assessed a \$20 per file number paper filing fee. In order to avoid this filing fee, you may submit your report online at www.kswaterusereport.org.

The approval of your application constitutes a permit to appropriate water. It does not give authority to construct any dam or other stream obstruction regulated by K.S.A. 82a-301 through 305a. It does not give authority to access any right-of-way or authorize trespassing upon or injury to public or private property. It may also be necessary for you to comply with other local, state or federal requirements. Enclosed is an informational sheet that sets forth the procedure to obtain a Certificate of Appropriation which will establish the extent of your perfected water right. Additional information and applicable forms may be found on our website at agriculture.ks.gov/divisions-programs/dwr. If you have any questions or need assistance with any of these requirements, please contact our office at 785-564-6640 or your local Topeka Field Office at 785-296-5733. If you call, please reference the file number so we can help you more efficiently.

Sincerely,

Kristen A. Baum
