George, I think these are the original sheets you sent out on 8/10/2008. (I don't think I made the same change in my temp email folder on both sheets...). If so, we may need to revise a cell reference.

Can you take a look at cell C4 on Attachment 6? It seems that this should be referring to Input line 195, not line 257. The Superior Canal Diversion (which should reference Input line 257) is in column E on Attachment 6.

Let me know if this is the case.

Subject: RRC Accounting Workbooks

Pursuant to today's Engineering Committee call, I am sending a revised workbook of each scenario and dated today. The only structural change I did was to add a column in Table 5B on the Water Short Year accounting to add in the 51.1% unused Colorado allocations previously left off. This change was done for 2006 only since the Accounting for 2005 has been approved. Additionally, I revised the header language for each table in the workbook so that when printed, the table clearly reflects which version of the accounting it represents.

Megan, I didn't get the new North Fork data. Could you send the proper value for the North Fork gage? I think the difference is probably the difference between provisional data collected in April and published data finalized at a later date. In any case, let's use the right number.

Page 2 of 2

Additionally, I have not completed the full documentation sheet on the face of each workbook. It should include the updated data sources, any structural changes, etc. However, I'll work on that before the work session next week.

Have a good weekend. Thanks.
