Kenny

The letter will be mailed out today. The estimate is a full supply.

What are you going to do with all that water?

Marv

Seems like a dumb question but what will we see in our Estimated Water Available report and when will we see it?

Developing a management plan for a full supply is almost as difficult(maybe more so) than a short supply. Following 1993, we managed for 8 years. Who knows this time.

Kenny
